

```
# Prompt user for x
x = int(input("x: "))
```

```
# Prompt user for y
y = int(input("y: "))
```

```
# Perform addition
print(x + y)
```

Remember:

To add: +

To subtract: -

To divide: /

To multiply: *

Now, make the same calculator capable of division instead

```
# Prompt user for x
x = int(input("x: "))

# Prompt user for y
y = int(input("y: "))

# Perform addition
print(x + y)
```

Remember:
To add: +
To subtract: -
To divide: /
To multiply: *

Compare two numbers
